

KV41 Assembled roving series

Roving nomenclature

Example: BCF 13-1200-KV41 Int. BCF - basalt continuous filaments 13 - monofilament diameter [µm] 1200 - linear density [tex] KV41 – type of sizing

Int./Ext. – type of bobbins
Int. – bobbin for internal unwinding

(tubeless)

Ext. – bobbin for external unwinding, wound on a tube with 76 mm internal diameter and 270mm length

Processing

KV41 is the newest modification of the KV11 sizing with improved performance and increased alkali resistance. Basalt roving of this series is mainly recommended for filament winding, pultrusion, processing into woven fabrics, UD tapes, multiaxial fabrics, prepregs and other products based on polyester and vinyl ester resins.
